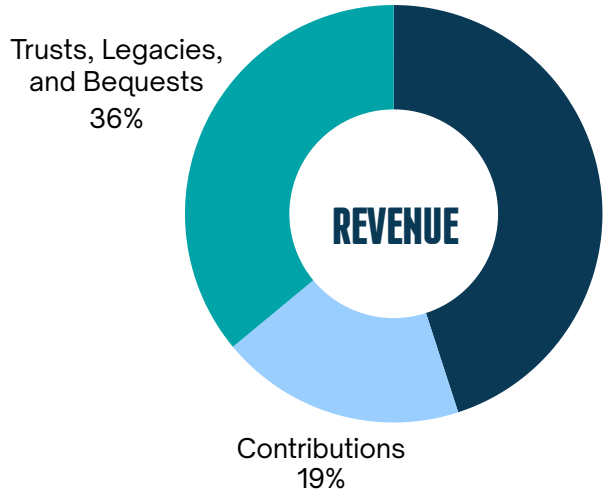
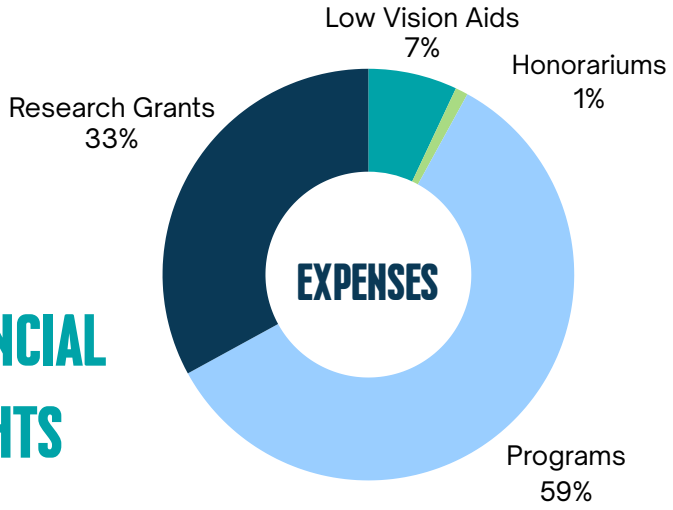
ILLINOIS SOCIETY FOR THE PREVENTION OF BLINDNESS

Dedicated to the care, protection, and preservation of sight through programs that support research, better living with low vision, and community education



FY26 FINANCIAL HIGHLIGHTS



Low Vision Aids and Replacement Glasses Grants
Everyone should have the best quality of life possible when living with low vision. We are proud partners with low vision clinics around the state to support residents of all ages. ISPB assists by purchasing low vision aids, scleral lenses, and glasses for those who cannot afford them.

Research Grants
Since 1980, ISPB has awarded over $2 million in grants to support translational research in eye and vision health. Awardees are medical students, residents, graduate students, postdoctoral fellows, assistant professors, and other junior faculty in the ophthalmology and optometry fields.

Eye Education, Screenings, and Exam Access
ISPB partners with Prevent Blindness Illinois to provide eye health and safety education for all ages throughout the state. Outreach programs include mobile eye clinics, training for health professionals, community health fairs, presentations, and ensuring access to quality eye care.

For more information, contact us: (312) 363-6029 efineman@preventblindness.org
